

J. Robert Selman, Co-founder, Senior Technical Advisor

Rob Selman is the co-inventor of AllCell's PCM technology and a Senior Technical advisor to AllCell. He has over 30 years of experience in battery and fuel cell research and development, and the global commercialization of these technologies.

Rob has been involved in electrochemical engineering of batteries and fuel cells at Argonne National Laboratory, the University of California Lawrence Berkeley Lab, and the Illinois Institute of Technology (IIT).

He has written over 135 journal papers and has six patents, among which are the basic patents for phase change material in Li-ion batteries (developed together with Said Al-Hallaj). In addition to his work at AllCell, Rob is a Distinguished Research Professor in chemical engineering at IIT. He won the Electrochemical Society's Energy Technology Award in 2002.

Rob holds a Ph.D. in chemical engineering from the University of California Berkeley, an M.S. in chemical engineering from the University of Wisconsin Madison, and is an alumnus of the Technological University Delft in the Netherlands.
